

## SKILLS

---

- Languages: TypeScript, JavaScript, GraphQL, Swift, Java, HTML/CSS
- Frameworks/Tools: React, Next.js, React Native, Tailwind.css, Git, Jest, React Testing Library, Figma

## WORK EXPERIENCE

---

### Herman Miller (MillerKnoll)

Associate Software Engineer

June 2023 – Present

- **Technology used: Salesforce Commerce Cloud, JavaScript, SASS, Next.js, React, TypeScript, Tailwind.css**
  - Maintained and delivered shareholder requests across all MillerKnoll E-Commerce sites using SFCC
  - Built and integrated user interface that meets growing business needs while fitting accessibility standards
  - Excelled within a fast-paced composable team of four developers, contributing 6+ story points each Agile sprint
  - Collaborated with developers to build out migration pipelines to Contentful CMS
  - Queried data from backend using GraphQL to pass into Google Places API

User Interface Engineer

May 2022 – June 2023

- **Technology used: Next.js, React, JavaScript, HTML, Jest, and Tailwind.css**
  - Shipped production level code with React.js for Millerknoll.com, contributing at least 20% of each release
  - Ensured each code change had 90% or more test coverage written in Jest or React Testing Library
  - Communicated with designers and authors to fine-tune style changes on Figma
  - Peer-coded with senior developers and participated in code reviews that emphasized growth and collaboration

## PROJECTS

---

### Personal Projects

- **Personal Portfolio** | Sept 2023 | <https://rebeccatian.dev>
  - **Technology used: React.js, TypeScript, Tailwind.css**
    - Holds all my projects from frontend, backend to mobile
  - Some projects included are:
    - Ticket Tracker: TypeScript, Next.js, PostgreSQL, Prisma – Handles SeatGeek API requests to display lowest prices and stores events in database
    - Anti-Boredom App: Swift– IOS mobile app that connects to API to generate random activities
    - Flappy Bird: Java, Java Swing – Remake of the classic Flappy Bird game into a desktop app

### Group Projects

- **Bite Butler** | Jan 2023 | <https://github.com/rebeccatian/bite-butler>
  - **Technology used: React Native, Firebase, Python**
    - Mobile app made for Hackathon 2023 that provide users with combined ratings
    - Worked under pressure on a small team of three developers
    - Developed user interface and set up database using React Native and Firebase as sole developer
    - Collaborated and aligned with team members on scaling our app to include rating algorithm
- **Corsair Web App** | Feb-May 2022 | <https://github.com/CarlosLopezRamirez/corsair-webapp>
  - **Technology used: Django, JavaScript, HTML/CSS, Bootstrap**
    - Web app made to connect alumni and students within Corsair
    - Led the front-end development team for the web app
    - Designed the mockups for every page using Canva
    - Contributed to around 80% of all the GitHub pushes on the project

## EDUCATION

---

The University of Georgia | Graduated May 2023 | Athens, GA

- **Bachelor's of Cognitive Science, Computer Science Minor**
- **GPA:** 3.77/4.00
- **Involvement:** Association of Computer Machinery, CodeHub, Corsair
